

A

A Monogram approach with Letter “O” creating the look of a Orbit. The logo incorporate elements that evoke the idea of orbit, such as concentric circles. This reflects the cyclical nature of storing and managing data in a repository. Small circles in orbit are the third Party libraries which will be used in future Eclipse projects. “O” is replaced with the Icon which can be used both ways.

B

Orbit

3d Circle Spiral is created with arc going around it ending on a node, 3D circle spiral on top and bottom of the node crescent is carrying a sense of dynamicness, timelessness and never ending cycle of storage which represent growth and futuristic approach. Circular revolving shape within the logo symbolize orbits and cycles and represent the continuous and secure storage and retrieval of data within the repository.

C

Orbit

Crescent and Circle is used to convey the message of unity, community, and stability. Revolving nodes coming from opposite direction symbolize interconnected nature of technology and the ability to connect different groups. Movement is shown through the nodes representing Growth.
